For immediate release.

LensFIT Update available

FixerLabs, developers of the award winning SizeFixer and FocusFixer software for digital image enhancement, have today released an update to their patented LensFIT technology to increase the range of supported cameras. Over 150 of the very latest models have been added to extend the range of cameras that can benefit from our unique Deconvolution and Super-Resolution technology. Examples of new supported cameras include:

- **Canon** – EOS 5D and EOS 30D
- **Nikon** – D50 and D200
- **Panasonic** – Lumix DMC LC1 and Lumix DMC LX1
- **Olympus** – E-330 and E-500
- **Fuji** – FinePix S9000Z and S9500Z

and for the first time selected camera phones including:

- **Nokia** - N70 and N90.

To benefit from this latest update customers can simply visit our home page at www.fixerlabs.com to check if their camera is now supported and then download and install the update in seconds.

For further information on SizeFixer, FocusFixer or other software products from FixerLabs, or to request an NFR copy for review, email Chris Bradley-Kidd at press@fixerlabs.com or phone on +44 (0) 1923 226655
