

FixerLabs, Watford, UK. 9, August 2006

**For immediate release.**

**SizeFixer XL for Windows now available.**

FixerLabs, developers of award winning software for digital image enhancement and enlargement, today released a Windows version of their flagship programme for image enlargement - SizeFixer XL. Based on their patented Super-Resolution technology, SizeFixer XL can enlarge images to 500 MPixels and beyond with unprecedented levels of quality. SizeFixer XL is a stand-alone 'upsizing' tool for serious Photographers and Graphic Designers who demand the very best quality. Key features include:

- **Enlarge images without loss of sharpness**
- **World-first use of Super-resolution technology**
  - Sharper upsized images
  - Improved contrast and fine detail
  - Excellent tonality
- **8-bit and 16-bit images**
- **RGB, JPEG & TIFF**

SizeFixer XL is available on CD direct from FixerLabs ([www.fixerlabs.com](http://www.fixerlabs.com)) or from good specialist retail outlets.
