For immediate release.

SizeFixer XL for Mac OS X

FixerLabs announced the launch of SizeFixer SLR at Photokina. SizeFixer XL for Mac OS X is now available.

SizeFixer XL is a stand-alone "upsizing" tool for the professional Photographer and graphics designer. It features:

- Enlarge up to 400% without loss of sharpness
- World-first use of super-resolution technology
- Powered by LensFIT technology to give
 - o Sharper upsized results
 - o Improved contrast on fine detail
 - o Excellent tonality
- Enlarges to A1 size and beyond
- Cropping made easy
- 8-bit and 16-bit photos
- RGB, JPEG, TIFF

SizeFixer XL is only available on CD and comes with:

- Free shipping
- Free upgrades on CD
- Free FixerBundle Photoshop plug-ins

SizeFixer XL is available from FixerLabs (www.fixerlabs.com) or in Europe from Colour Confidence (www.colourconfidence.com).
